## DETAILED ACTION

### *Response to Arguments*

1. Applicant's amendment filed 06/17/2008 with respect to the rejection(s) of claim(s) 1-17 under 102(b) is sufficient to overcome the anticipation rejection.

Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of the same prior art under the 103 statute.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 5-31 rejected under 35 U.S.C. 103(a) as being unpatentable over Westmeyer.

4. The instant invention is directed to a sealed container comprising hydroalkoxysilane and a carboxylate. The prior art is drawn to a method for stabilizing a hydroalkoxysilane by allowing the hydroalkoxysilane to coexist with a carboxylate. Table 2 in columns 7-8 discloses hydroalkoxysilane (MeOa)SiH that coexist with multiple carboxylates. The prior art fails to clearly teach a sealed container of the claimed composition.

The examiner contends that the language sealed container reads on a beaker in the lab with a cover. For instance the cover could be paraffin. It is routine for a

Art Unit: 1621

skilled artisan to store mixtures in the lab with paraffin in order to prevent the evaporation of the liquid and to maintain the initial concentration of the solution.

Thus it would have been obvious to one having ordinary skill in the art to have put the solutions of Westmeyer in a sealed container. The language of transporting the sealed container reads on simply moving the covered beaker from one point to another.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
